**TITLE:** Subject Matter Expert Technical Specialist (6618142)

**JOB DUTIES:** Provide Subject Matter Expertise for the following services supported by the team in a multitenancy environment: Active Directory (AD), System Center Configuration Manager (SCCM), Virtualized Machines in Hyper-V and VMware running Windows OS (Includes Virtual Desktops and Servers). Create reports to be used for data analysis by the customer. This also includes producing server inventories, managing and reporting on certificates and reporting on several of the management systems in use by the team. Work with engineering groups to deliver value to customers. Responsible for the security and management of Windows servers and desktops in non-production and production environments. Solve complex integration and technical problems in a dynamic fast-paced environment. Work with other Systems Administrators, DBAs, and application developers to resolve various system issues and escalate and liaise with additional groups when required, resulting in satisfactory resolution. Resolve incidents impacting hosts or environment. Investigate & troubleshoot root causes via problem management. Create, review, maintain and update documentation. Facilitate knowledge amongst colleagues. Plan and control execution of releases into the managed environment. Provide input into Business Continuity Planning and Practices. Assist in major planned events such as power down and disaster recovery. Respond to severity 1 and 2 escalations. Develop and maintain windows platform for the server as a host, connected with multiple clients (other computers). Test and certify new versions of windows operating system providing better solution and integration for the application like VMware and SharePoint. Integrate the server automation process either by custom scripts or via third-party solutions. Implement regular checks for the status of servers including hardware and software. Maintain and support multi-site windows environment along with hardware and software configuration. Maintain server migration when required by the client. Telecommuting is permitted. Will work at unanticipated end client sites throughout the U.S.
